

Final Demo Day and Peer Review Announcement

Dear students,

As we are approaching the end of the semester, each student will prepare a **final demo presentation** to demonstrate the work completed throughout the course.

1. Demo Day Schedule

The final demo will be arranged over the following three weeks:

Date	Activity
6/11	Final Demo Day 1
6/18	Final Demo Day 2
6/25	Final Demo Day 3

Each class session is **150 minutes**.

Each student will have approximately **11 minutes** in total:

- **9 minutes** for presentation and live demo
- **2 minutes** for Q&A and transition

Please control your presentation time carefully.

2. Presentation Slide Requirement

Each student must prepare a presentation slide deck to summarize and demonstrate their semester work.

Suggested slide structure:

1. Title slide

- Course name
- Student name
- Student ID

- GitHub account

2. Semester learning summary

- What you learned in this course
- Tools and technologies used
- Most important growth

3. Personal website

- Website URL
- Technologies involved
- Design concept
- Personal thoughts about the website

4. Course repository

- Repository URL
- Repository structure
- Course accomplishments
- What this repository demonstrates

5. Project 0: Two Sum

- Project goal
- Algorithm idea
- Development history
- Testing result
- Project highlight

6. Project B: CSV Mini Database

- Project goal
- Main functions
- Data design
- Development history
- Project highlight

7. GitHub workflow evidence

- Commit history
- Branches
- Pull requests
- Merge history
- Collaboration or review evidence, if available

8. AI-assisted development reflection

- How you used AI tools
- What AI helped you with
- What AI could not solve
- How you verified AI-generated results

9. Challenges and solutions

- Technical difficulties
- Git/GitHub difficulties
- Debugging experience
- How you solved the problems

10. Final reflection

- What you learned
- What you would improve
- How this course helps your future learning

3. Required Demo Items

During the presentation, each student should demonstrate the following items:

1. **Personal Website**

- Technology involved
- Design concept
- Personal thoughts and future improvement

2. **Course Repository**

- Accomplishments in this course
- Assignment records
- Learning process and reflection

3. **Project 0 Repository: Two Sum**

- Problem understanding
- Development history
- Code/testing highlight

4. **Project B Repository: CSV Mini Database**

- Main functions
- Development history

- Technical highlight
- Testing or usage demonstration

4. Peer Review Requirement

Peer review is required during the demo days.

Each student must review classmates' presentations using the peer review form. The purpose of peer review is not only to give scores, but also to learn from others' work and provide constructive feedback.

For each reviewed presentation, students should provide:

- Scores based on the review criteria
- One strength of the presentation
- One suggestion for improvement
- One thing learned from the presenter

Please be respectful, objective, and constructive in your feedback.

5. Evaluation Focus

The final demo will focus on the following aspects:

- Completeness of required repositories and website
- Clarity of presentation
- Evidence of semester learning progress
- GitHub workflow and development history
- Technical understanding of Project O and Project B
- Reflection on AI-assisted software development
- Ability to explain challenges, solutions, and future improvements

6. Important Notes

Please make sure that:

- Your GitHub repositories are accessible.
- Your personal website link works correctly.
- Your slides are prepared before your demo day.
- Your demo links are included in the slides.
- You can explain your own work clearly.
- You complete the peer review form during the demo session.

The final demo is an opportunity to show not only what you completed, but also how you learned, how you developed your projects, and how you used AI tools responsibly during the software development process.

Please prepare carefully.
